Professional Profile

2 years of formal experience + 1 year teaching classes. Team player, focused on details, constantly searching for improvement and learning. Proficient in an assortment of technologies, including **Node.js**, **TypeScript** and **PostgreSQL**.

Work History

Apr 2022 - Jul 2023

Junior Full Stack Developer

Geosystems S.A. · <https://www.geosystems.com.ar/en/>

A company specialized in geographic information systems.

- Developed an **API** using **ASP.NET**, bridging communication between systems and facilitating data exchange, resulting in improved efficiency and streamlined processes.
- Built a **Python** based **API** that seamlessly integrated with a **PostgreSQL** database, enabling real-time data retrieval and manipulation for enhanced system functionality.
- Upgraded an **npm package** to a newer version of **React**, strengthening the package with a more robust architecture and improved performance, while also transitioning from **JavaScript** to **TypeScript** and from **CSS** to **SCSS**.
- Introduced standardized coding conventions to the development team, leading to increased collaboration and code readability, resulting in more efficient bug identification and resolution.

Sep 2021 - Mar 2022

Unemployed

Actively looking for a new job as my last company closed.
Got married.

Feb 2021 - Aug 2021

Junior Backend Developer

Ulthar Software

A small company that used to build customized software.

- Developed an **API** in **Node.js** using **Serverless**, **TypeScript** and **MongoDB**, with a strong emphasis on both functionality and performance.
- Implemented a **TDD** approach using **Jest**, ensuring the reliability and functionality of the project.
- Collaborated with team members to provide mutual support and assistance, leading to increased productivity and efficiency within the team.

Skills

Languages: Spanish, English and learning German.
